WORK EXPERIENCE

Freelance

Remote

Automation & Lead Generation Specialist

03/2025 – Present

- Engineered AI-enhanced prospecting systems, including cold DM funnels and conversion flows.
- Integrated REST APIs and webhooks with customized logic to streamline data management.
- Established and managed automation workflows (n8n in progress) to optimize lead generation.
- Leveraged bias-driven UX principles to enhance user engagement and improve conversion rates.

Freelance

Remote

Web Developer

01/2025 – Present

- Developed and customized WordPress sites tailored for real estate and small to medium-sized businesses (SMBs).
- Implemented strategic SEO initiatives to enhance website traffic and increase conversion rates.
- Designed and deployed full stack MERN applications, allowing for scalable user platforms that adapt to growth.

Technaps

Remote

Frontend Developer, Internship

01/2025 – 03/2025

- Conceptualized a comprehensive full stack booking system using React, Express, and MongoDB.
- Prioritized intuitive UI/UX design and seamless API integration to enhance user satisfaction.

Codey

Remote

Web Developer

02/2023 – 11/2023

- Delivered innovative responsive web solutions for client businesses, including CRM dashboards and interactive UI features.
- Collaborated effectively on both front-end (React, Tailwind CSS) and back-end (Node.js, Express) components.
- Ensured that websites met SEO readiness, optimized performance, and incorporated client-specific customization.

3D SMART FACTORY

Remote

Junior Data Scientist

06/2023 – 08/2023

- Developed machine learning models to analyze and predict industrial data trends for smart manufacturing.
- Contributed to data cleaning, exploratory data analysis (EDA), and initial model experimentation using Python (pandas, sklearn).
- Collaborated within a team to prototype dashboards for real-time monitoring of production KPIs.

Barid Media

Casablanca, Morocco

Web Developer

03/2021 – 08/2021

- Designed and implemented a delivery note management application, automating the processes of creation, editing, and tracking delivery notes.
- Optimized database handling and user experience, resulting in a 50% reduction in manual search time through enhanced access to archives.
